***Response to Amendment***

The amendment filed on January 14, 2004 has been considered and an action on the merits follows.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim 4 is remains rejected under 35 U.S.C. 102(b) as being anticipated by Cowling (US 5,381,683).** Cowling discloses a method for forming a domed can end from a sheet of material (17) in a press (fig. 3) having a fixed base (fig. 3) and a moving punch assembly (15). Cowling discloses the steps of:

forming an outer portion of the dome (see fig. 6). The outer portion is defines as the portion of the dome (17) between reference numeral (26) to reference numeral (27). Figure 6 shows this outer portion is being formed as a punch center (15) moved downwardly toward a reform pad (16);

forming an inner portion of the dome (fig. 7). The inner portion is defines as the portion of the dome (17) between reference numeral (24) to reference numeral (25). Figure 7 shows this inner portion is being formed as the punch center (15) moved into contact with the reform pad (16) to form two inner beads (24, 25);

forming a crown (figs. 7-8).

***Response to Arguments***

Applicant argues that the Cowling reference does not disclose the amended claim 4, this argument is not found persuasive because Cowling does disclose the invention as claimed as set forth in the rejection under 35 U.S.C 102 (b) above.

***Allowable Subject Matter***

Claims 1-3 and 5-11 are allowed.

The following is an examiner's statement of reasons for allowance: the art of record, considered alone or in combination, neither anticipates nor renders obvious a method for forming a domed aerosol can end from a sheet of material in a press having a fixed base and a movable punch assembly, the method comprising the steps of: advancing an outer redraw sleeve and a dome punch to form an outer portion of the dome of the domed aerosol can end between the outer redraw sleeve and a dome die; advancing the dome punch to form an inner portion of the dome with a dome form die, wherein a knockout and a crown ring holding a workpiece to control the flow of material into the inner portion of the dome, in combination with the rest of the claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
